

Overview

Hydroplan is seeking a qualified **Deputy Team Leader / Construction Supervision Engineer (National)** to support implementation and supervision services for a donor-funded water supply and sanitation infrastructure project in Kiribati.

The assignment involves supporting the Team Leader in overseeing construction supervision activities, ensuring quality control of infrastructure works, and assisting national counterparts throughout the implementation and commissioning phases of the project.

Scope of Work

The Deputy Team Leader / Construction Supervision Engineer will support the coordination and supervision of project implementation, with responsibilities including:

- Assisting the Team Leader in overall coordination of construction supervision activities
- Supervising construction works related to water supply and sanitation infrastructure
- Reviewing engineering designs, technical specifications, and contractor submissions
- Ensuring construction quality, compliance with technical standards, and adherence to contract requirements
- Supporting procurement processes and contract administration for works and equipment
- Monitoring construction progress, schedules, and contractor performance
- Assisting with testing, commissioning, and handover of completed infrastructure
- Supporting environmental, health, and safety compliance during construction
- Coordinating with government counterparts, contractors, and stakeholders
- Contributing to project reporting, monitoring, and documentation

The role requires close collaboration with the project management unit, executing agencies, contractors, and donor representatives to ensure timely and high-quality delivery of project outputs.

Minimum Qualifications

Education:

- Bachelor's degree in **Civil Engineering** or a related field
- Chartered Professional Engineer (or equivalent professional registration) preferred

Experience:

- **8–10 years of professional experience** in water supply and sanitation infrastructure projects
- Demonstrated experience in **design, procurement, construction supervision, and commissioning** of water and sanitation systems
- Proven experience supervising civil works and managing contractors on infrastructure projects

- Familiarity with international construction standards and contract management procedures
- Experience working on **donor-funded infrastructure projects** (e.g., Asian Development Bank, World Bank) is considered an asset
- Previous experience in **small island developing states or remote project environments** is an advantage

How to Apply

Please submit your **CV highlighting relevant experience** to i.zeiri@hydroplan.de / info@hydroplan.de / ivanira.james@hydroplan.de

Applications should be submitted no later than 23 March 2026. Only shortlisted candidates will be contacted.

Ensure the subject line reads:

Application – Deputy Team Leader / Construction Supervision Engineer – Kiribati
